MEMORANDUM FOR: Distribution List (Attached)

SUBJECT: Key Word Index to CHIVE Phase II Report

REFERENCE: My memorandum of 7 July 65; subject: Project CHIVE Phase II Report

1. Referenced memorandum transmitted Volumes I and II of the Phase II Report, and noted that the design effort (and the full report of seven volumes) involves customer interest from all parts of the Agency, plus support considerations including security, personnel, space, training and the like.

2. For ease in referring to appropriate sections of the Phase II Report, the attached Key Word Supplement has been prepared.

3. In a memorandum dated 16 September to the Director of Computer Services, the DDI approved the recommendations on pages 37-38 of Volume II, except for certain reservations on design concepts and implementation (specifics are available to those interested), and except for Recommendation f., concerned with the hardware backup for CHIVE.

4. Referenced memorandum in para. 5 noted the usefulness of an individual point of contact in each office for future discussions. I have received names from seven offices and would welcome others (ext. 5211 or 1212 (red)).

CHIVE Project Officer

Attachment: a/s

PREFACE

This volume is an index to the other seven volumes of the Project CHIVE Phase II Final Report. The index consists of an alphabetical arrangement, by key word, of all the significant terms appearing in the headings and subheadings (as well as figure and table titles) of the Phase II Report. Surrounding each alphabetized word are the preceding and succeeding words of the heading in which it appeared, up to a limit of 60 letters. The column to the right of each permuted title gives the volume and page number of the indexed heading.
